EQUITY OUTLOOK

The Nifty gained 4.5% in the month, supported by (1) robust festive demand, (2) easing global trade tensions and (3) decent 2QFY26 earnings. Mid-cap and small-cap indices were up 5.8% and 4.7%, respectively. All sectoral indices ended higher. The realty, IT and oil & gas sectors were up 9%, 7% and 6%, respectively. Globally, South Korea (+20%), Japan (+17%) and Taiwan (+9%) made significant gains. FIIs turned buyers to the tune of \$206mn (secondary) and DIIs remained net buyers to the tune of \$5.9bn.

On the domestic economy front, high frequency indicators (like E-way bill, GST collection, CPI, PMI) suggest marginal improvement in economy. September GST collections were recorded at ₹1.96 tn, up by 4.6% YoY. Manufacturing PMI rose to 57.7, suggesting strength in domestic demand helped offset slowdown in export growth. CPI inflation moderated to 1.5% in September on the back of food price contraction, while core inflation firmed up to 4.5% due to a sharp uptrend in bullion prices. WPI inflation cooled to 0.13% in September from 0.52% in August. IIP growth in September declined to 4% as against 4.1% in August.

The Sep quarter results season has broadly trended inline. Earnings of the 27 Nifty companies that have declared results so far have grown 5% YoY (vs. est. of +6% YoY). The downgrade ratio, though negative, has improved QoQ and more than two-fifths of cos saw earnings upgrade. Lending financials, O&G, property delivered largely positive qtrs. Consumer staples broadly weaker, and most others mixed. Sustainability of the GST driven consumption uptick is key for stronger earnings trajectory.

Other key developments: (1) the RBI MPC unanimously kept the policy repo rate unchanged at 5.5%, while maintaining the stance at neutral, (2) IMF revised India's FY2026 GDP growth forecast to 6.6% from 6.4%, (3) the SEBI has published a consultation paper aimed at areas such as fee transparency and protection for the mutual fund industry, (4) the SEBI extended its deadline for changes in bank indices used for derivatives trading, (5) India's primary market witnessed its highest-ever IPO activity in a single month; in October, there were 10 IPOs raising US\$5 bn.

Overall, at the portfolio level, we remain invested in high quality franchisees and expect these businesses to continue to deliver healthy earnings growth over the medium to long term.
