### Performance

Performance as on September 30, 2024 / Source: ABSLAMC Internal Research

Disclaimer: Past performance of any product does not indicate its future performance. Performance data is based on Time-Weighted Rate of Return (TWRR) for aggregated performance statistics of all investors. Please note that performance of your portfolio may vary from that of other investors and that generated by the Investment Approach across all investors because of the timing of inflows and outflows of funds; and differences in the portfolio composition because of restrictions and other constraints. Investment approach level performance reported is not verified by SEBI.

Power Grid Corporation of India Ltd	4.4%
Interglobe Aviation Ltd	4.2%
ABB India Ltd	3.6%

## Equity Outlook

Indian markets ended the month with a 2.3% gain in Nifty while we did see some underperformance in broader market with Mid-cap index gaining +1.5% and small-cap index declining -0.7%. At the beginning of the month, investors remained cautious ahead of the key US economy data release. An aggressive interest rate cut by the US Federal Reserve and long-awaited stimulus measures from China helped to boost investor mood in the second half of the month. Globally, Hang Seng and Shanghai Composite soared 18% each for the month while Thailand, the Philippines and Singapore were up 7%, 5% and 4%, respectively. Brazil, South Korea and Japan declined 3%, 3% and 2%, respectively. FPIs bought US\$5.4 bn of Indian equities in the secondary market, whereas DIIs bought US\$3.8 bn.

Cumulative rainfall as on 27-Sep was 7% above the long-term average (LTA). Spatial divergence has continued, with North and West India (5%), Central India (19%), and the southern peninsula (15%) all above LTA, whereas East and North East India (-14%) remain below LTA. Total area under sowing (110.5mnha), as on 20-Sep, is higher (2% YoY) than last year. This is mainly due to healthy sowing for most major food crops – Rice: (41.4mnha; 2% YoY), pulses (12.9mnha; 8% YoY), coarse cereals (19mnha; 4% YoY), and oilseeds (19.4mnha; 2% YoY). Among non-food crops, lower cotton sowing (11.3mnha; -9% YoY) is a concern. Overall area under sowing is at 100% of normal area sown, compared with 100% at the same point in 2023.

On the economy front, high frequency indicators (like E-way bill, GST collection, loan growth, PMI) continue to suggest healthy levels of economic activity. The gross GST revenue collected in the month of September is at Rs 1.73tn up 6.5% YoY. CPI inflation inched up marginally to 3.7% from a 59-month low of 3.5% in Jul'24. Food inflation picked up on a YoY basis led by vegetables. However, sequentially there was a significant moderation in food inflation due to lower vegetable prices. Core inflation remained stable at 3.4%, as lower inflation in personal care and effects category offset the marginal increase seen in other categories. IIP growth rose a tad to 4.8% in Jul'24 from 4.7% in Jun'24, supported by jump in manufacturing sector. Mining and electricity output eased in Jul'24, due to monsoon activity. On FYTD basis as well, growth remains stable at 5.2% so far (Apr-Jul'24). Within manufacturing, boost has been provided by industries like refinery products, machinery, and other transport equipment. In terms of use-based classification, only capital goods and intermediate goods recorded an improvement in Jul'24, while other sectors continued to register a slowdown.

Other key developments: (1) the Federal Reserve began its rate cut cycle with a 50 bps rate cut, with the federal funds rate now at 4.75-5%, (2) China announced various stimulus packages to support the economy, (3) the Indian government has increased the minimum wage rates for the unorganized sector by revising the variable dearness allowance, (4) Moody's revised its CY2024 GDP growth forecast for India to 7.1% from its earlier estimates of 6.8%; S&P retained India's FY2025 growth forecast at 6.8%. (5) the current account in 1QFY25 moved back to a deficit of US\$9.8 bn (1.1% of GDP)—4QFY24 current account surplus was revised down to US\$4.6 bn.

Overall, at the portfolio level, we remain invested in high quality franchisees and expect these businesses to continue to deliver healthy earnings growth over the medium to long term.
