Consistency of performance across market cycles

What creates this sustainable wealth-creation portfolio?

The Top 200 Core Equity Portfolio consists of 25-30 stocks selected predominantly from a large-cap universe. The investment approach is founded on four pillars:

- Sustainable growth over long term in select industries, which makes up for most of the GDP growth patterns
- Focus on businesses that consistently create value through favourable industry operating conditions
- Quantitative Screeners backed by fundamental research:
Comprehensive alert system to track industry-wise valuations.
Current studies include:
Recurring Winners Study, Piotroski Scores
- Value-investing approach to generate alpha

Portfolio Managers

Vishal Gajwani

With over 11 years of experience in equity research and portfolio management, Vishal has extensive expertise in researching companies across sectors and market capitalisations. Prior to this assignment he was a part of Reliance Portfolio Management Services (a part of Reliance Capital Asset Management Ltd), where he was designated as an Assistant Fund Manager and was responsible for managing equity portfolios.

He is a Gold Medal winning Chartered Accountant (ICAI, India) and holds a Masters degree in Commerce from M. S. University of Baroda. Vishal received 4 Gold Medals, including the Chancellor's Gold Medal, for topping the Master of Commerce Exams. Vishal is also a CFA charter holder from the CFA Institute (The Global Association of Investment Professionals), USA.

Portfolio Managers' Commentary

Equity Outlook

The union budget has tried to provide a direction to the government's economic and social agenda. The focus is on the economic development of India's rural & low-income households; continued commitment to economic reforms, and taxation policies to achieve the stated objectives. While the intent is clear, the effectiveness will lie in the execution.

Some of the immediate pressing concerns were addressed by the Finance Minister which include opening of the capital account for foreign investors, liquidity support to the Banking & finance sector, improving the tax & non tax revenues & impetus to the housing sector.

With the macro data & high frequency growth indicators over the last 3-4 months signaling towards a marked slowdown in consumption & tight liquidity conditions, the government has taken few steps to address the growth concerns. A one-time guarantee will be given for loss upto 10% for purchase of high rated pooled assets of financially sound NBFCs, which amount to around Rs.1 lakh crore. Also, government have provided for Recapitalisation of public sector banks to the tune of Rs.70,000 cr. which may help the PSU banks to provide for bad assets & boost the growth capital leading to higher credit growth.

The government's plan to build 1.95 cr. houses is expected to provide stimulus to real estate & other allied sectors viz. housing finance, building materials & consumer discretionary.

The fiscal deficit target of 3.3% for FY20 looks a bit optimistic as the government has budgeted for lower tax revenues while maintaining the expenditure level. While on the other hand, borrowing from external markets is expected to lower the supply of bonds in India & thus might lower the interest rates in the economy.

We would like to summarize by stating that the budget has tried to address the near terms problems in the economy while at the same time being prudent. The government has refrained from being socialistic and have not announced measures to boost the consumption through short-term populist measures which would directly put money in the hands of the consumer, as was the norm historically.

Portfolio Update

Pharmaceuticals and Consumer Goods sector has contributed positively to the portfolio. Bajaj Finance, Trent, Shree Cement , Abbott India and Reliance Industries are the funds top 5 performers.

In our view, as the earnings cycle picks up backed by improving macro and stable government, the stock market divergence witnessed in the last 18 months is expected to get corrected. We assume India's structural growth story to be intact and high quality businesses are expected to continue creating wealth for the investors.
